Applicant: Gregory John Billington et al.

Attorney's Docket No.: 07703-414001

Patent No.: 6,390,269 Issued: May 21, 2002

Serial No.:

Filed: May 19, 2004

Page : 2 of 5

Amendments to the Claims:

Amend the following claims as indicated below:

1. (Amended) A device for handling money, including:

money handling apparatus;

an internal controller for controlling the money handling apparatus;

a first port for removable connection to an external controller for communication with the internal controller; and

a second port for removable connection to a further device for handling money;

wherein the internal controller is arranged to communicate over the second port with the further device using a communications protocol; and

wherein the communications protocol <u>supports</u> [enables] communication between the internal controller and any one of at least first and second different types of device for handling money, the first type handling money of a different type from those handled by the second type.

8. (Amended) A device for handling money, including:

money handling apparatus;

an internal controller for controlling the money handling apparatus;

a first port for removable connection to an external controller for communication with the internal controller; and

a second port for removable connection to a further device for handling money for communication with the internal controller;

wherein the internal controller is arranged to copy the content of <u>at least some</u> signals between the first port and the second port <u>without modification thereof</u>.
